PL PRODUCT FEATURES

BYPass Installation - Electronic Ballasts

This PL V lamp is not compatible with electronic ballasts and requires bypassing the ballast during installation. The lamp runs directly off line voltage to eliminate compatibility problems, incidental power loss, lifetime issues, and maintenance costs associated with ballasts.

HYBrid Installation - DIrect or BYPass - Magnetic Ballasts

When used with a magnetic ballast, the PL V can function as a plug & play lamp and operate with the existing ballast. If the ballast is not compatible, it can be bypassed and the lamp can run directly off line voltage.
